Experience

SportsEngine

December 2018 - present

Front End Developer

- Build front end tools and components for sportsengine.com using PHP, Angular, Javascript, and HTML/SASS.
- Drupal 8 site theme building and maintenance.
- Performed QA testing and code reviews to ensure excellent product quality.
- Email development with Salesforce Marketing Cloud, Pardot and Marketo.
- Built landing pages and email templates/modules for GOLNOW B2B marketing team.
- Develop within an Agile workflow to deliver projects and tasks on time.
- Help the transition of converting projects into an Angular framework.
- Experience with JIRA and Confluence project management tools

Martin Williams

May 2016 - November 2018

Front End Developer

- Develop interactive and responsive web pages using JavaScript, jQuery, PHP, CSS, Bootstrap and HTML.
- Build custom WordPress themes in collaboration with a designer.
- Update, maintain and add functionality to existing websites on both front-end and back-end.
- Able to develop web projects from Adobe Photoshop and InVision files.
- Create responsive marketing emails. Used Litmus for testing and Pardot for deployment.
- Develop digital banner ads using HTML5, CSS animations and Google Web Designer.
- QA testing projects across multiple browsers and devices.

- Websites that I have worked on: www.thestudiomint.com, www.syngenta.com

OLSON

Jan 2016 - Mar 2016

Software Engineer Intern

- Successfully built custom web features for OLSON's Tally application using JavaScript, AngularJS, NodeJS, HTML and CSS.
- Worked closely with the UX lead to redesign and implement a user interface component.
- Developed wireframes and implemented Bootstrap components that were used for the Tally application.
- Worked on a team of developers that effectively used scrum to accomplish goals and to meet deadlines.

Prime Digital Academy

Aug 2015 - Nov 2015

Full Stack Software Engineering - Student

Prime Digital Academy is an 18 week program designed to prepare students for employment in the software/applications development field. Students learn HTML/CSS development along with full stack development utilizing the JavaScript based MEAN stack (Express.JS, Node.JS, AngularJS, and MongoDB).

CHOICE - Case Manager

Feb 2011 - Jul 2015

- Created Individual Program Plans that provided clients employment, productivity, independence, and community
- Managed and modified multiple client files in accordance to state rules and regulations.

Education

Prime Digital Academy

Aug 2015 - Nov 2015

Full Stack Software Engineering Certification

Kansas University

Aug 2005 - May 2010

Bachelor of General Studies; Psychology, Film Minor
